True Wealth Management

About Us

Davis & Hodgdon CPAs and Copper Leaf Financial are two independent but affiliated entities. Our adherence to the fiduciary standard empowers us to suggest the proper financial products that will help achieve your goals and that kind of freedom changes everything.

Our holistic approach to wealth management includes a plan that is designed to integrate and enhance every aspect of your financial life: from tax planning, estate planning and retirement funding, to charitable giving and beyond. By understanding and aligning these critical components of financial health, we are able to help you reach your most important goals.

Where Tax and Finance Meet.

Copper Leaf Financial, LLC is a SEC registered adviser affiliated with Davis & Hodgdon CPAs (“D&H”). For more than 30 years, D&H has provided comprehensive and timely planning with a proactive approach to tax services. Together, we have the ability to combine comprehensive financial planning with the careful, tax-aware eye of the CPA to give clients the confidence to map out their financial goals. Our leadership team includes licensed CPAs and Certified Financial Planner® professionals who can contribute an unparalleled understanding of how taxes impact your decisions about retirement, estate planning, investments and insurance.

We prize evidence over emotion and we value academic and market research over fluctuating opinions.

How We're Different

Fiduciary. We provide advice and recommendations that are in your best interest. Period. Our independence and adherence to the fiduciary standard allows us to provide unbiased investment advice.

Fee-Only. We provide 100% transparent, fee-only wealth management services based on your unique needs. No commissions, no third party referral fees.

Our Investment methodology is based on academic research and an evidence-based portfolio construction. We work with you over the long term to develop a plan that acts as a roadmap - and evolves over time. We believe that money is made over time and diversification is the key to long-term investment success.

Our logical, rational approach is based on your goals, income needs and time table. We look closely at these factors to determine your tolerance for the market's ups and downs – in other words, your ability, willingness and need to take risk. Once we identify where you fall on this spectrum, we develop a portfolio that gives you the greatest odds of success.

Our Areas of Expertise

Sustainable Planning

Aligning your investments with your values is just the beginning.

We think that your entire financial plan should be a reflection of who you are and how you think. With overall alignment throughout your plan the potential to make a difference is enormous — for yourself, your community, even the world at large.

We use academic research to integrate sustainable investing into your portfolio. **We specialize in sustainable “planning” because it really includes alignment across your entire financial plan – not just investing.**

We help you achieve an overall alignment between your values, your investments, your community and your charitable giving.

Charitable Giving

Philanthropic giving is a special area of focus at Copper Leaf Financial.

We help you create a giving plan that maximizes your charitable dollar so that you can give more and have the greatest impact.

Specifically, we help you develop a purposeful charitable giving plan that includes:

- Clear, focused giving goals that reflect your values and are organized within a formal giving statement. We also help you identify the cause areas aligned with your values and select the organizations that are most effective at attaining your philanthropic goals.
- A detailed philanthropic budget that is aligned with your financial plan and includes categories for proactive, reactive, and emergency giving.
- Giving “vehicles” that are best suited for your personal situation and budget with careful attention to tax savings strategies and family considerations.

Reach out to us today and find out how purposeful giving can fit into your financial and legacy plans.

Our Process

Legacy Planning.

As assets are transferred between spouses and ultimately heirs, we coordinate income requirements, tax considerations, and other intentions. The goal is to positively impact the client's wealth on the lives of others – either heirs or charity.

Introduction.

This is an introduction that can easily be done in -person or virtually. Getting to know each other and providing you with a detailed understanding of our process is an important first step in designing a roadmap to your financial and personal goals.

Discovery.

We listen to what's important to you so that we can clearly understand your vision, values, priorities, goals & concerns. Collect financial information, investment statements, tax returns & legal documents, and assess the current overall state of your financial health.

Strategize & Implement.

Develop a map by presenting analysis and strategies. We address your needs, wants and wishes in a coordinated approach. Saving, investing, risk-management, and tax optimization set the foundation for smooth action toward your goals. Your personal Investment Policy Statement directs the way forward.

Distribution Planning.

Optimizing income from all sources – including investments – in a tax efficient way can increase the longevity of the plan. Smart rebalancing and distributions can increase philanthropic impact while preparing for legacy objectives.

Fine-Tuning & Transition Planning.

Focus on step-by-step tasks to accomplish your goals. Regular progress meetings move the process forward in achievable steps, supported by your vision and values. Tax optimization, Roth conversions, to-do's while working, to-dos in retirement, rebalancing, etc. Here, we move you to the next step in your personal plan, i.e. transitioning into retirement, or establishing an estate plan.
